

*Active Pony*

Humanscale®

PRODUCT HIGHLIGHTS

# Active Pony

Created to complement Humanscale's award winning Freedom task chairs, Active Pony is among the most versatile and ergonomically comfortable stools on the market. This stool features the compact pony saddle seat, a unique triangular cushion that reduces pressure points for long-term comfort while supporting a healthy lumbar spine. Active Pony was designed to encourage movement, allowing users to gently rock 7° in all directions. This added movement targets a wider variety of core muscles, which helps build strength and minimize fatigue.

## Features

- Compact —triangular and saddle-like seat design lowers the thighs and opens the hips, supporting a healthy lumbar spine
- Contoured seat cushion with waterfall edge is sculpted to follow the body curve, reducing pressure points, and optimally distributing weight for long-term comfort
- Height-adjustable pneumatic cylinder accommodates various seat/surface heights
- Designed to fit 95% of the office population (5'0 – 6'4" height, 100 lbs – 300 lbs weight)
- Available in a variety of high-performance textiles, including anti-microbial and chrome-free leather
